State Water Resources Control Board /Regional Water Quality Board	RWQCB regulates all projects with point discharges to surface water or land. Non-point discharges (including ag runoff, even from tile drains or ditches) not regulated; have close relationship working with Monterey County Dept of Public Health and Dept of Pesticide Regulation on projects affecting drinking water. Also coordinate regularly with USEPA on NPDES permits. Permits required for discharge of waste to surface waters via discrete conveyances such as ditches, pipelines (called point source pollution). Individual permits are tailored for specific discharges where as general permits cover multiple facilities within a single category like storm water point sources)	Discharges regulated under CA Water Code. Additionally, discharges to surface waters are regulated also under Clean Water Act and 40 Code of Federal Regulations (CFR).
